PROFESSIONAL SUMMARY

Senior Frontend Engineer with nearly 5 years of experience building production React, TypeScript, and React Native applications. Led frontend work for a public browser extension used by approximately 300k users. Strong in UI architecture, design systems, performance optimization, accessibility, REST API integrations, testing, code review, mentoring, and product-focused collaboration with design, backend, and engineering teams. Served as Frontend Team Lead from May 2022 to August 2026.

TECHNICAL SKILLS

Core: React, React Native, TypeScript, JavaScript, Tailwind CSS.

Frontend: HTML5, CSS3, Material UI, responsive UI, design systems, Storybook, performance optimization.

Architecture and APIs: React architecture, Redux, REST APIs, authentication, validation, error handling, browser extension APIs.

Mobile: Android/iOS, mobile wallet UX.

Testing and quality: Playwright, Vitest, Jest, E2E testing, CI/CD, WCAG, ARIA, keyboard accessibility, release readiness.

Tooling: Bun, Node.js, Vite, Webpack, WXT, GitHub.

Web3: Solana, Sui, DeFi, DEX/CEX, wallet integrations, multichain applications.

Leadership: Team leadership, mentoring, code review, planning, technical decision-making.

AI-assisted development: Claude, ChatGPT, Codex for debugging, refactoring, testing, and code review support.

WORK EXPERIENCE

Senior Frontend Engineer

Sep 2021 - Aug 2026

Synthetify Labs

Kraków, Poland

- Built and maintained production React/TypeScript applications, including a public browser extension used by approximately 300k users.
- Drove refactoring of React architecture, component structure, responsive layouts, performance, and maintainability.
- Implemented responsive interfaces, API integrations, validation, error states, reusable UI components, and accessibility improvements.
- Worked with product, design, and backend engineers on Figma-to-code implementation, product behavior, integrations, testing, and release preparation.

Frontend Team Lead

May 2022 - Aug 2026

Synthetify Labs

Kraków, Poland

- Coordinated a six-person team across three concurrent product workstreams, including planning, task breakdown, delivery follow-up, and technical support.
- Owned code reviews, mentoring, frontend quality standards, and day-to-day technical decisions across web and mobile products.
- Supported release readiness, collaboration with product, design, and backend teams, and consistent implementation of accessibility and UX requirements.

SELECTED PROJECTS

Nightly Extension

Apr 2022 - Aug 2026

Synthetify Labs

- Public Chrome and Firefox extension for wallet management, assets, transactions, dApp usage, and blockchain integrations.
 - Led redesign work, onboarding improvements, new integrations, implementation priorities, and product-facing technical decisions across Wallet UX, browser extension APIs, authentication flows, and REST API integrations.
 - Replaced Material UI with a custom Tailwind CSS and Storybook component system, improving UI consistency, delivery speed, and product flexibility.
 - Improved responsive UI, accessibility, keyboard/focus behavior, error states, performance optimization, and maintainable React architecture within extension-platform constraints.
 - Supported Playwright E2E testing, release readiness, CI/CD workflows, secure UX review, and AI-assisted implementation/debugging.
- Tech: React, TypeScript, Tailwind CSS, Storybook, Bun, Vite, Webpack, WXT, Redux, Redux-Saga, Playwright, REST APIs.

Nightly Mobile

Apr 2022 - Aug 2026

Synthetify Labs

- Public Android and iOS cryptocurrency wallet for asset management, account flows, transaction flows, and multichain usage.
 - Managed developer coordination, testing, release readiness, implementation decisions, and responsive mobile UI quality across React Native screens.
 - Worked on Wallet UX, multichain integrations, API error handling, performance, maintainability, and AI-assisted code review/support workflows.
- Tech: React Native, TypeScript, Bun, Redux, Redux-Saga, REST APIs.

Synthetify

Sep 2021 - Apr 2022

Synthetify Labs

- Implemented borrowing and leverage frontend flows for synthetic crypto assets, API-driven data, validation, responsive UI, and performance-sensitive DeFi interactions.
- Tech: React, TypeScript.

EDUCATION

M.Sc. in Computer Science

Feb 2021 - Sep 2023

Cracow University of Technology, Faculty of Computer Science and Telecommunication

- Characteristics of price related fluctuations in non-fungible token (NFT) market. Chaos, 2024. DOI: 10.1063/5.0185306.
- Correlations versus noise in the NFT market. Chaos, 2024. DOI: 10.1063/5.0214399.

LANGUAGES

Polish: Native

English: B2
